UDH3—Underdesk Computer Hanger

The storage and protection solution.

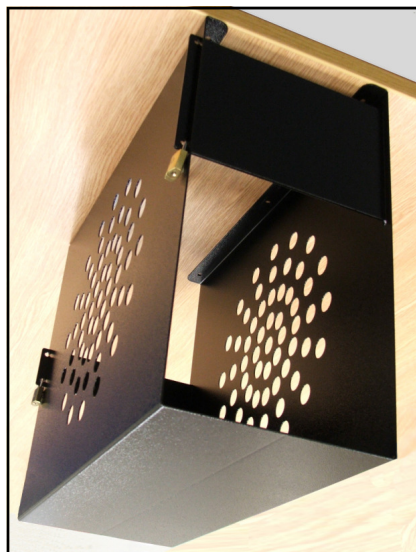

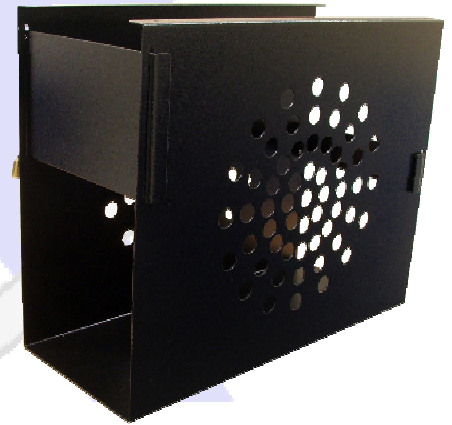

Introducing the UDH3, the underdesk computer tower hanger/bracket designed to secure and protect your PC.

These units are produced in the UK to our highest quality manufacturing standards and offer a safe and robust storage solution for all makes of computer.

The UDH3 is manufactured from 1.5mm steel and is supplied complete with two 3mm thick locking bars and two keyed alike padlocks. The units have been painted in tough black powder coat to ensure that they are able to withstand the knocks and bumps associated with day to day use in any busy environment.

The units have been designed with security in mind, that's why the fixing flanges face inwards towards the centre of the unit. Once fixed to the desk and a PC is installed it is not possible to access the screws and hence you can be sure that the UDH3 will remain where you fit it.

The units have been manufactured with ventilation holes on both sides; this ensures good airflow around your PC to prevent overheating whilst it is in use.

The dimensions for each UDH3 are 460mm long (front to back), 193mm wide (side to side) and 373mm high. The locking bars are approximately 210mm in length.

We are also able to offer these units for custom applications and in other sizes. Front and rear blocking/masking or door options are available as specials upon request. On large quantities we are able to offer colour options or modifications please contact us for further details.

All units are supplied boxed. Please note that we do not supply fixings as these will need to be specific for the type of table or desk that is to be used.
